ABDELRAHMAN MOHSEN ELSAIED

Full Stack Software Engineer | Strong Laravel Backend Specialization

Egypt | +201063170724 | abdelrahman.mohsen.elsaied94@gmail.com
LinkedIn: linkedin.com/in/abdelrahman-mohsen-025a9725a | GitHub: github.com/abdelrahmanmohsen123 | Portfolio: abdelrahmanmohsen123.github.io

PROFESSIONAL SUMMARY

Full Stack Software Engineer with deep backend specialization in PHP, Laravel, RESTful API architecture, and MySQL database optimization. Substantial verified frontend development experience using JavaScript (ES6+), jQuery, Laravel Blade, HTML5, CSS3, and Bootstrap. Demonstrated track record of significant end-to-end development ownership across commercial production platforms in logistics, live sports data, financial markets, and services marketplaces. Proven ability to architect resilient data models, design clean API contracts for mobile clients, build responsive administrative dashboards, and deploy production systems on Linux environments.

TECHNICAL SKILLS

Backend Engineering: PHP, Laravel Framework, RESTful API Design & Architecture, Authentication & Authorization (Sanctum/RBAC), Complex Business Logic, Background Jobs & Asynchronous Queues, Eloquent ORM.

Frontend Engineering (Verified): JavaScript (ES6+), jQuery, Laravel Blade Templating, HTML5, CSS3, Bootstrap (v4/v5), Responsive Design, DOM Manipulation.

Databases & Caching: MySQL, Relational Database Schema Design, SQL Query Optimization, Database Indexing, Foreign Key Integrity, Redis Caching.

Tools & Infrastructure: Git, GitHub, Bitbucket, Postman (API Testing & Collections), Linux (Admin 1 / Bash), Apache, Nginx, Docker Fundamentals, Composer, npm.

Currently Expanding Skills: Advanced Linux System Administration, DevOps & CI/CD Pipelines, AWS Cloud Fundamentals, Data Analysis.

PROFESSIONAL EXPERIENCE

Arab Apps — Egypt **03/2023 – Present**

Full Stack Software Engineer / Backend Developer (Full-time, On-site)

- Exercised significant end-to-end development ownership across flagship production systems including FastEx, DotScore, Mangoul, Asaar Plus, and Gold Fawry.
- Architected robust PHP/Laravel backend services, asynchronous queue workers, and RESTful APIs consumed by mobile applications and client web portals.
- Engineered responsive administrative dashboards and client interfaces using Laravel Blade, JavaScript, jQuery, and Bootstrap for real-time fleet operations and order workflows.
- Designed and optimized relational MySQL database schemas, indexing strategies, and caching layers to maintain high throughput under peak traffic loads.
- Implemented intricate business workflows: driver bidding mechanics, real-time match event feeds, digital wallet ledgers, and automated financial cron jobs.
- Collaborated with cross-functional mobile engineers (Flutter/iOS/Android) and product managers to define clear API contracts and accelerate product releases.

CyperFace **05/2021 – 06/2022**

Fullstack Developer (Remote)

- Developed dynamic web applications, implementing backend business logic with PHP & Laravel and frontend user interfaces with JavaScript, jQuery, HTML5, and Bootstrap.
- Constructed relational database models in MySQL, wrote database migrations, and implemented secure role-based authentication flows.
- Integrated third-party APIs, webhooks, and payment notifications with defensive error handling and data validation.
- Managed source code versioning using Git/Bitbucket across distributed team sprint cycles.

SELECTED PRODUCTION PROJECTS

FastEx (https://fastex.delivery/) — Logistics & Transportation

Significant End-to-End Development Ownership

- Architected delivery dispatch engine, driver real-time bidding algorithms, geo-distance calculations, and internal wallet ledger system for transactions.
- Developed administrative operations dashboard with Laravel Blade, JavaScript, and Bootstrap for fleet and order tracking.

DotScore (https://dotscore.net/) — Sports Technology

Significant End-to-End Development Ownership

- Designed high-frequency RESTful endpoints delivering live match events, line-ups, and standings under heavy traffic with Redis caching.
- Built interactive match-center components and dynamic status updates using JavaScript, jQuery, and Bootstrap.

Mangoul (https://mangoul2.com/) — Services Marketplace

Significant End-to-End Development Ownership

- Built quotation lifecycle, role-based access control (RBAC), and verified provider dispatch workflows for moving services in Saudi Arabia.
- Engineered comprehensive administrative dashboards and quotation comparison views with Blade and JavaScript.

EDUCATION & PROFESSIONAL DIPLOMAS

Information Technology Institute (ITI), MCIT — Mansoura Branch — 11/2022 – 02/2023

Professional Diploma — Fullstack Web Development using PHP (3-Month Intensive Track)

- Key Learnings: Advanced PHP, Laravel Framework Architecture, RESTful API Design, Relational Database Modeling (MySQL), Blade, JavaScript, and Git Workflows.

National Telecommunication Institute (NTI) — 01/2021 – 05/2021

Specialized Diploma — Web Design & Backend using PHP Laravel & Node.js (4-Month Track)

- Key Learnings: Responsive Web Design (HTML5, CSS3, JavaScript, Bootstrap), Server-side PHP & Laravel fundamentals, and Node.js basics.

Higher Engineering Institute of Science and Technology — New Damietta — 2013 – 2018

Bachelor of Science (B.Sc.) in Engineering — Civil Department

- Key Learnings: Rigorous analytical problem solving, applied mathematics, project management, and structured systems engineering.
