ABDELRAHMAN MOHSEN ELSAIED

Backend Software Engineer | PHP & Laravel Developer

Egypt | +201063170724 | abdelrahman.mohsen.elsaied94@gmail.com
LinkedIn: linkedin.com/in/abdelrahman-mohsen-025a9725a | GitHub: github.com/abdelrahmanmohsen123 | Portfolio: abdelrahmanmohsen123.github.io

PROFESSIONAL SUMMARY

Backend Software Engineer specializing in PHP, Laravel framework, RESTful API architecture, and MySQL database optimization. Extensive experience architecting high-throughput server-side systems, designing secure authorization protocols, managing background jobs and queues, and optimizing complex database queries. Demonstrated track record of significant end-to-end development ownership across commercial production platforms in logistics, live sports data, financial markets, and two-sided marketplaces. Hands-on experience with Linux server deployment, Apache/Nginx web servers, and Docker containerization fundamentals.

TECHNICAL SKILLS

Backend Engineering: PHP, Laravel Framework, RESTful API Design & Architecture, Authentication & RBAC (Sanctum/Passport), Complex Business Logic Architecture, Background Jobs & Asynchronous Queues, Eloquent ORM & Performance Tuning, Payment & Webhook Integrations.

Databases & Caching: MySQL, Relational Schema Modeling (ERD), SQL Query Optimization & Profiling, Indexing & Foreign Key Integrity, Data Normalization, Redis / In-Memory Caching.

Frontend & Dashboards (Hands-on): JavaScript (ES6+), jQuery, Laravel Blade, Bootstrap (v4/v5), HTML5 / CSS3.

Tools & Infrastructure: Git, GitHub, Bitbucket, Postman (Collections & Testing), Linux (Admin 1 / Bash), Nginx & Apache Server Setup, Docker Fundamentals, Composer.

Currently Expanding Skills: Advanced Linux System Administration, DevOps Engineering & CI/CD Pipelines, AWS Cloud Fundamentals, Data Analysis.

PROFESSIONAL EXPERIENCE

Arab Apps — Egypt **03/2023 – Present**

Backend Developer (Full-time, On-site)

- Exercised significant end-to-end development ownership across backend engines, RESTful APIs, and administrative control panels for DotScore, FastEx, Mangoul, Asaar Plus, and Gold Fawry.
- Architected and implemented high-volume RESTful APIs serving mobile applications with strict authentication, input validation, and optimized JSON payloads.
- Designed and tuned complex MySQL database schemas, composite indexes, and caching strategies to maintain low query latency during high concurrency events.
- Implemented critical domain logic: geospatial driver dispatch, real-time bidding workflows, live match event pipelines, internal wallet ledgers, and automated financial cron jobs.
- Partnered with frontend and mobile developers to structure robust API schemas and streamline backend deployment procedures.

CyperFace **05/2021 – 06/2022**

Fullstack / Backend Developer (Remote)

- Built web application backend architectures and database models utilizing PHP, Laravel, and MySQL.
- Developed user authentication systems, role management, and integrated external APIs and payment gateways.
- Collaborated on frontend integration using Blade, JavaScript, and Bootstrap for dynamic client views.

- Maintained version control with Git/Bitbucket and resolved system defects in production.

SELECTED PRODUCTION PROJECTS

DotScore (https://dotscore.net/) — Sports Technology

Significant End-to-End Development Ownership

- Engineered high-frequency live match event endpoints, automated external data synchronization jobs, and Redis caching layers.
- Structured optimized query routines handling rapid live score updates and league standings recalculations without database locks.

FastEx (https://fastex.delivery/) — Logistics & Transportation

Significant End-to-End Development Ownership

- Architected ride dispatching workflows, driver offer bidding algorithms, location-based services, and transactional wallet ledgers.
- Deployed secure RESTful APIs consumed by client and driver mobile applications.

Mangoul (https://mangoul2.com/) — Services Marketplace

Significant End-to-End Development Ownership

- Engineered two-sided marketplace architecture, quotation bidding lifecycle, and role-based access control (RBAC).
- Built admin dispute resolution mechanisms and audit logging pipelines for platform integrity.

EDUCATION & PROFESSIONAL DIPLOMAS

Information Technology Institute (ITI), MCIT — Mansoura Branch **11/2022 – 02/2023**

Professional Diploma — Fullstack Web Development using PHP (3-Month Intensive Track)

National Telecommunication Institute (NTI) **01/2021 – 05/2021**

Specialized Diploma — Web Design & Backend using PHP Laravel & Node.js (4-Month Track)

Higher Engineering Institute of Science and Technology — New Damietta **2013 – 2018**

Bachelor of Science (B.Sc.) in Engineering — Civil Department
